PREFACE

This book is a serial collection of teaching and learning (TnL) innovation from the competition of *Teaching Enhancement & Learning Innovation Carnival 2020* (eTeLIC' 20). It is the first-ever virtual carnival organised by the Centre for Academic Excellence and Development (CAED), Deputy Vice-Chancellor (Academic & International) Office, Universiti Malaysia Kelantan (UMK) on 21 September 2020 through an online platform, Google Meet. One hundred fourteen (114) entries from higher educational institutions and schools all over Malaysia had participated in the carnival. The carnival fits with the current situation that encourages remote teaching due to the COVID-19 crisis with the theme of “New Norm: Cultivating Online Learning”. Educators are massively affected, and they critically need to learn, unlearn, and relearn to remain sustained and relevant in the inevitable paradigm shift to online learning. This book has 20 innovations, focusing on asynchronous online learning with constructive alignment that considers cluster determination following MQF 2.0. The book’s contributors share their current Teaching and Learning (TnL) innovations, ideas, and best practices that are critically needed to be adopted and adapted, especially amid the COVID-19 pandemic. The uniqueness of each approach is that combining various creative and interactive tools and techniques prepared on the online selected platforms asynchronously. These asynchronous approaches can be applied across all disciplines, either in Science or Social Science. This book hopes to be a guidebook not limited to lecturers and other educators in different education levels.
