

The COVID-19 pandemic has become a worldwide crisis and impacts the various sector globally. The virus has been spread from Wuhan, China, in December 2019 and has been declared as a Public Health Emergency of International Concern by The World Health Organisation (WHO) in January 2020 and as a pandemic in March 2020. The pandemic has affected the world in various aspects economically, including transportation, tourism, healthcare as well as the education sector. Students from primary school to tertiary education has no exception. Malaysia's Prime Minister, Tan Sri Muhyiddin Yassin, has announced Movement Control Order (MCO) in response to COVID-19 on 18th March 2020. All the offices, shop lots, restaurants, and most of the industry except essential services are compulsory to close their operations. The COVID-19 pandemic has also had a great impact on the education system. From kindergarten, school, college, and university have to close the doors and find alternative learning opportunities.
