

CYBER SECURITY EVERYONE SHOULD ALERT

WHO SHOULD READ
THIS BOOK?

Cybersecurity issues are becoming more critical, especially in today's digital world, whereby people are now dealing with cyber-physical intersection environments in every aspect of their life. Attacks now take place on multiple levels and are no longer purely technical. Thus, due to the aggressive growth of various techniques that support massive changes of Industrial Revolution 4.0 and beyond with advanced human-machine interactivity technology, Artificial Intelligence, Big Data Analytics and Robotics Technology, cybersecurity challenges have become more complex than before. Criminals are using their creativity and technology to launch cybersecurity attacks. This book explores the critical cybersecurity issues to everyone and practical solution for cybersecurity professionals and business owners to practice.

"This book is a must read which provides user's awareness on cybersecurity to protect themselves from cyber threats."

Professor Dr. Mohd Nazri Bin Ismail
Cyber Security and Digital Industrial Revolution Centre,
National Defence University of Malaysia.

"Cyberthreats have the potential to impact everyone. This book serves as a valuable educational resource, empowering us to remain vigilant and fulfill our responsibilities in addressing this intricate issue",

Lt Col Haji Mustaffa bin Ahmad (Retired) C|CISO psc
Senior Vice President, CyberSecurity Malaysia

"A must-read for anyone invested in the future technology and security."

Dzafir Jaffar
Cybersecurity Professional
